BUILD UP Skills
The Netherlands

IEE/12/BWI/335/SI2.65966
Okt 2013 – Okt 2015
Updated 21 November 2013

Project summary

BUILD UP Skills
The Netherlands

Main objectives & results

To reach cooperation between the most important actors and stakeholders in order to

- complete the schemes for post-initial training
- develop training materials on interdisciplinary craftsmanship
- unlock available courses and trainings for the workforce
- monitor the results
- unlock potential financing sources
- train a network of trained teachers, trainers and HR-advisors.

Background

Analysis of the status quo shows

- lack of coordination & information on available courses
- lack of interdisciplinary schemes & training materials
- a gap between existing vocational education and training (VET) qualification structure and post-initial education.

Major benefit is that courses will become better available and affordable.

This will lead to a massive roll-out by market actors of their up skilling activities.

Steps to reach objectives

BUILD UP Skills
The Netherlands

- The development and implementation of official accreditation for existing post-initial trainingschemes
- Unlock funding for following post-initial training courses
- Development and implementation of a qualification structure for post-initial training
- Development of two missing qualifications
- Development of interdisciplinary training materials
- Adding the developed schemes and the inventory of courses to existing course catalogues
- Training of 'trainers', who will become ambassadors both on a branch-level and in companies or training providers

Expected impact

- 30.000 upskilled employees in 2015
- 80 trainers trained, who will train 720 trainers
- 70 HR-advisors trained
- 135 workplace trainers trained to train 1,000 workplace trainers
- Clear view on available courses and their quality
- Good training materials for interdisciplinary craftsmanship
- A flexible and up-to-date monitor
- Unlocked €1.000.000,- additional funding
