Main features

Scenario

Construction sector needs to achieve the 2020 energy targets by promoting a strong, competitive and sustainable sector.

Needs

Cross-cutting measures based on results of previous projects.

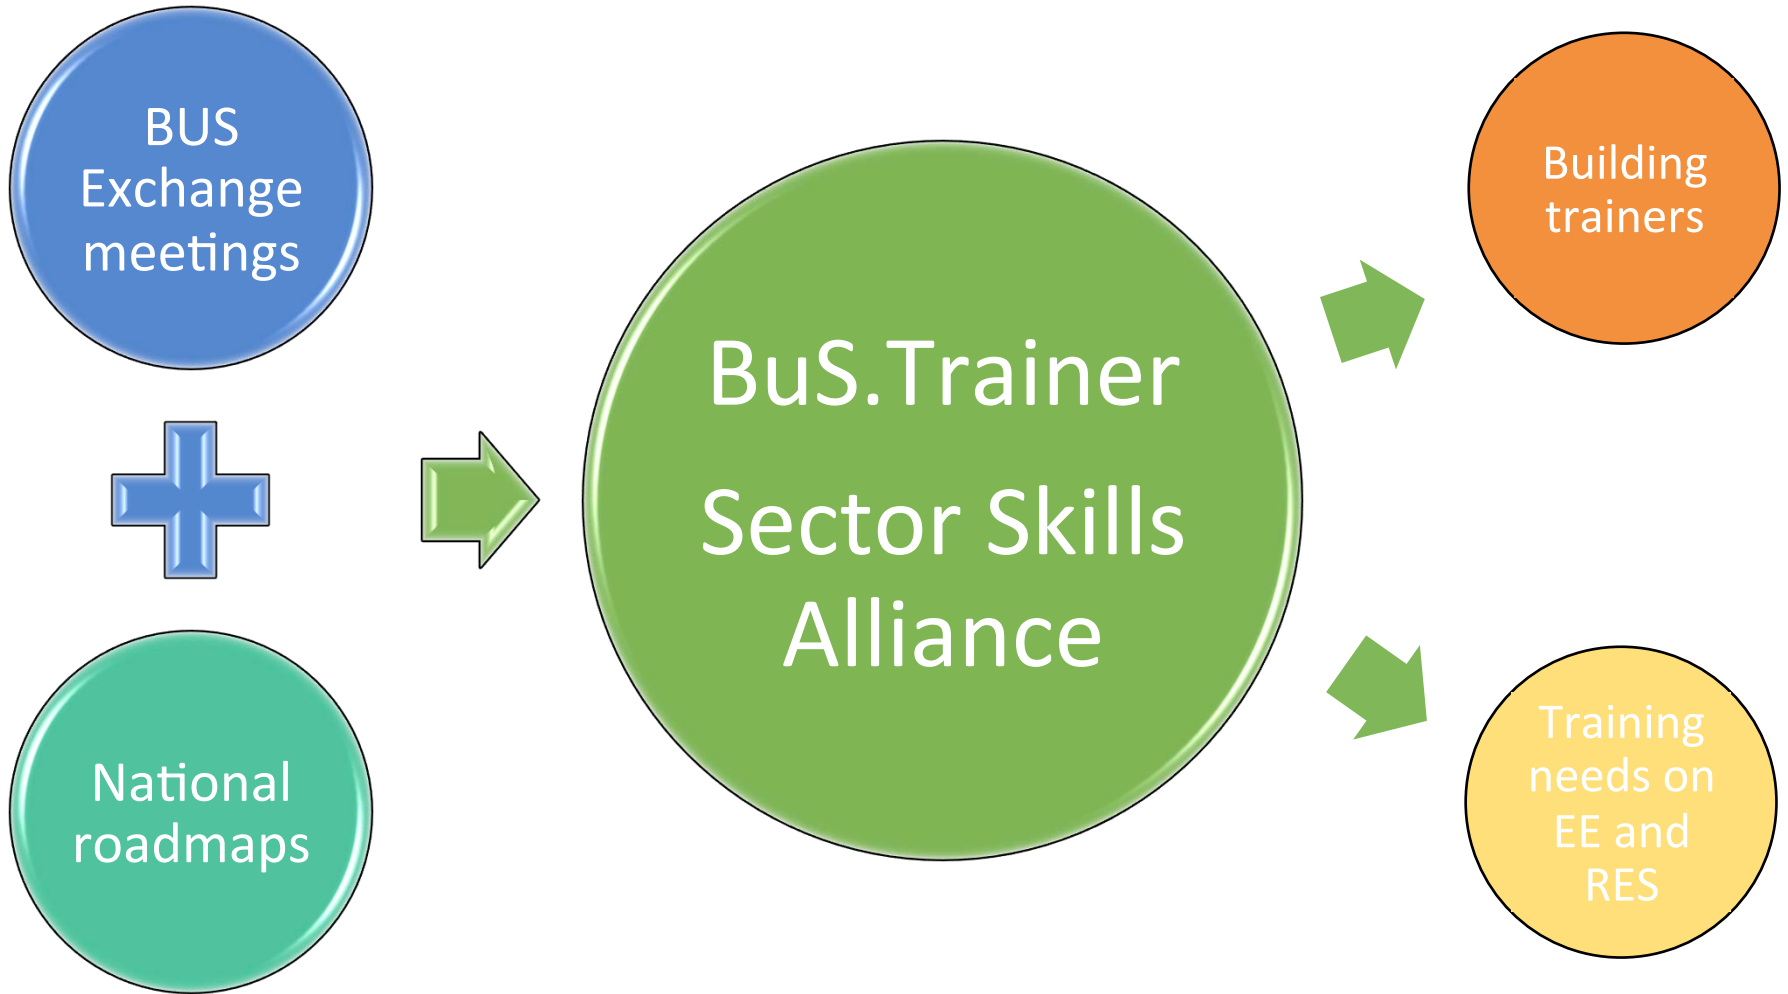

Evidences

Team up to undertake actions envisaged to overcome skills mismatch, by means of TTT with green skills.

Actions

Background

Project objectives

Develop and deliver a training system for Vocational Trainers to better perform teaching in sustainable construction

Implement a **platform** to build community and support teachers in their permanent professional development

Work out a new European sectoral qualification standard (**Green VET Trainer at construction**) following the EQF methodology, ECVET and EQAVET principles

Train the trainers
in green skills with
new technologies
for mobile devices

Innovative features
