

# SMART<sup>2</sup> OBJECTIVES

## THE SMART<sup>2</sup> PROJECT

The **Smart Square Project (Smart Tools for Smart Buildings: Enhancing the intelligence of buildings in Europe)**, aims to develop and deliver the appropriate tools and applications, for the promotion and establishment of intelligence assessment of buildings, through the Smart Readiness Indicator (SRI) scheme.

**01 SRI Audits in pilot buildings**

Development of a standardized building smartness audit procedure, that will be tested on 6 pilot buildings to determine its capacity for implementation.

**The SRI Observatory**

The SRI Observatory, as an information hub, will monitor & document developments around the SRI and will inform stakeholders, through regular SRI Outlooks, for the new elements and the progress of the scheme.

**02**

**03 The SMART<sup>2</sup> SRI Call Center**

The call center will aim to issue over 3600 ratings during its operation. It will concern the online issuance of SRI ratings and finding interested parties for interviewing and issuing the rating.

- Development of Tools**  
 Development of tools & services that will boost the uptake of the SRI scheme among the EU member states
- AI & IoT Technologies**  
 Roll out of ICT smart ready technologies including AI & IoT for smarter SRIs
- A cloud based platform**  
 Commissioning of a cloud based open platform for assessing the intelligence of buildings, tailored for building designers, facility managers & building users
- SRI Audit process**  
 Development of an SRI audit process, acting as the forerunner of a standardized procedure
- Building Digital Logbooks**  
 Establishment of the required grounds for the integration of the SRI Ratings in building digital logbooks
- Smart Readiness aspects in Buildings Energy Performance**  
 Integration of the SRI calculation procedure into the EPC extraction processes.
